

OSAMA WAZIR

Data Analyst

Riyadh, Saudi Arabia | Iqama: Transferable | +966 564 458 309 | uukhan44@gmail.com | linkedin.com/in/osama-wazir-32488a25a

[Osama Wazir](#) | [Data Analyst Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 2+ years of experience transforming raw operational data into actionable business insights. Proficient in Power BI dashboard development, SQL data engineering, Python-based statistical modeling, and process automation. Proven track record of improving reporting efficiency by 25% and saving 10+ manual hours per week through automation. Currently based in Riyadh with a transferable Iqama and immediately available for new opportunities.

TECHNICAL SKILLS

Data Visualization: Power BI (Dashboards, KPIs), Microsoft Excel (Advanced)

Database & Querying: SQL (Complex Queries, Joins, Data Cleaning, Optimization)

Programming: Python (Pandas, NumPy, Scikit-Learn), JavaScript

Statistical Modeling: Linear Regression, Logistic Regression, Predictive Modeling

Process Automation: Python scripting, Logic-based workflow automation

Soft Skills: Cross-functional collaboration, Problem-solving, Time management, UAT leadership

PROFESSIONAL EXPERIENCE

Data Analyst (Remote) | Systems Limited

June 2023 – July 2025

Swat, Pakistan (while completing BS IT at University of Malakand)

- Designed and deployed interactive Power BI dashboards to track KPIs across regional operations, improving management reporting efficiency by 25%.
- Wrote and optimized complex SQL queries to extract, join, and clean millions of rows of raw operational data from relational databases.
- Applied linear and logistic regression models using Python (Pandas, NumPy) to analyze customer behavior trends and forecast quarterly operational demands.
- Developed logic-based Python scripts to automate redundant weekly Excel reporting tasks, saving the department approximately 10 hours of manual work per week.
- Partnered with software development teams during the SDLC to validate data structures and led User Acceptance Testing (UAT) for a new internal inventory tracking tool.

ACADEMIC PROJECTS

Crop Yield Prediction & Analytics — BS IT Final Year Project

- Developed and trained a high-accuracy Machine Learning predictive model in Python to forecast regional crop yields using environmental, soil, and historical climate datasets.
- Utilized Pandas and NumPy for data preprocessing: cleaning raw agricultural data, handling missing values, and performing feature scaling.
- Implemented linear and logistic regression algorithms via Scikit-Learn to analyze variable correlations and evaluate model accuracy metrics.
- Generated data visualizations to present predictive model insights clearly, bridging the gap between complex data and practical agricultural planning.

EDUCATION

University of Malakand — Swat, Pakistan

2025

Bachelor of Science in Information Technology (BS IT)

Vision Polytechnic Institute

2019

Diploma of Associate Engineering — Electrical (DAE)

CERTIFICATIONS

- **Python for Beginners** — UniAthena
- **Certified Document Controller** — Hiqual
- **Web Development Certification** — NFTP — National Freelance Training Program
